The Your ENERGY STAR Canada Client Portal: Manufacturer View

Canada

YESCan

Your ENERGY STAR Canada is a new portal launching in 2024 that allows for the submission of Canadian ENERGY STAR regulated products and to provide product shipment data.

This demonstration will show you:

1. How to login to the system
2. Register for the program
3. Submit Product Shipment Data

ENERGY STAR

- As you know, Canada is an international partner of the ENERGY STAR® program of the U.S. Environmental Protection Agency (EPA).
- We here at Natural Resources Canada are responsible for administering and monitoring the use of the ENERGY STAR name and mark(s) in Canada.
- Consumers in Canada use the ENERGY STAR name and mark(s) to identify products that perform at premium levels of energy efficiency without sacrificing appearance, features or quality.
- As such, ENERGY STAR is a collaborative effort between the public and private sectors - an effort intended to promote products and equipment that use less energy, while providing the same or better performance than those with conventional designs.

ENERGY STAR Participation

- To use the ENERGY STAR name and symbol in Canada, a Participant Administrative Arrangement with NRCan must be signed.
- The Participant agrees that it is important to maintain the integrity of the ENERGY STAR brand as a trustworthy symbol for energy-efficient products.
- The Participant must adhere to requirements, including:
 1. Third party verification testing, whether selling products in the U.S. or only in Canada.
 2. Provide unit shipment data by March 1st of the previous Calendar Year annually, or as requested by NRCan, starting in 2024 for 2023 shipment data.
- In support of, and with the goal of ensuring the relevance and continuing improvement of ENERGY STAR Canada, Participants are asked to respond to requests for information or feedback in a timely manner.

YESCan Portal

The New YESCan portal will replace the emailed submission of data and allow:

- Participants to upload their submissions directly into the system, track its status, receive submission reports, and ask questions.
- Provide manufacturers the capability to run queries on products previously submitted by them, or on their behalf.
- Provide the ENERGY STAR team the capability to track and approve submissions and run reports as part of their daily activities for reviewing submissions and performing product audits.
- Automate the distribution of approved products to the searchable product lists for ENERGY STAR and grants such as Greener Homes.
- Participants to provide product shipment data for Fenestration, and eventually Heat/Energy Recovery Ventilators (HRVs)

Objectives of the New System

- Reduce workload for both stakeholders and NRCan
- Provide more useful digital tools and better functionality to business stakeholders
- Reduce time spent on processing submissions/data and allow more time for compliance promotion and enforcement activities
- Better alignment with provincial and international partners

Key Features

- Secure system: Users must create accounts and log into the system.
- Manufacturers will be able to:
 - Enter Product Shipment Data directly into the system
 - Review submissions for products submitted on their behalf
 - Ask questions to program staff
 - Run searches on their already submitted reports

Shipment Data

Please fill out the shipment information required every year for the year prior. Submitting shipment data is available from January 1st to March 1st, but you can request an extension using the questions panel on the right.

Reporting Period: Calendar Year 2022 (Jan. 1 to Dec. 31)	2022	2022
Product Type	ENERGY STAR Canada Unit Shipments	Total* Canada Unit Shipments (ENERGY STAR + non-ENERGY STAR within scope)
Total Window Products	<input type="text" value="1,556"/>	<input type="text" value="2,487"/>
Total Hinged Door Products (including sidelites and door transoms)	<input type="text" value="0"/>	<input type="text" value="0"/>
Total Sliding Glass Door Products	<input type="text" value="0"/>	<input type="text" value="0"/>
Total Unit Skylight Products	<input type="text" value="0"/>	<input type="text" value="0"/>
Reporting Period: Calendar Year 2022 (Jan. 1 to Dec. 31)	2022	
Most Efficient Product Type (Subset of Totals)	ENERGY STAR Canada Unit Shipments	
Total ME Windows	<input type="text" value="0"/>	
Total ME Sliding Glass Door Products	<input type="text" value="0"/>	

How Can We Help?

If you need help with product submissions, generating reports, or shipment data, ask us a question.

Question Title

* Questions have a maximum length of 250 characters

Ask your question

Submit

*To help ensure NRCan's market penetration calculations are accurate, NRCan requests that you provide your total Canada shipments (ENERGY STAR certified products plus non-ENERGY STAR products) for calendar year 2023 to inform aggregated industry total. The Canada shipments are for products that fall within scope of the product specification.

Submit

From Jan 1st to March 1st the Product Shipment data page will be unlocked for the previous calendar year, allowing Manufacturers to provide the information.

You can now enter your shipment data for Windows, Hinged Doors, Sliding Glass Doors and Skylights.

There are values for Total Shipment, ENERGY STAR and ENERGY STAR Most Efficient.

When complete, click **Submit**. If you change your data, and resubmit, your previous submission will be overwritten.
