

MANDATORY ATTESTATION FORM

Oil to Heat Pump Affordability Program

Heat Pump

The purpose of this mandatory form is to allow the applicant to seek attestation from the contractor retained to design and install the heat pump system(s) that the installed heat pump meets the heat distribution eligibility criteria of the Oil to Heat Pump Affordability program. In addition, for ground source heat pumps, to seek attestation that the installed system was designed and installed in accordance with the latest version of the CSA/C448 standard "Design and installation of ground source heat pump systems."

Heat distribution: the Oil to Heat Pump Affordability program requires that the air source heat pump system be capable of distributing heat throughout the entire conditioned space in the house, including the basements where the distance from the top of the floor slab to the bottom of the ceiling joist is 1.8 m or higher. This applies whether the heat pump system is a central ducted, mini- or multi-split ducted or ductless system. For a typical house, this usually requires a minimum of one warm air supply outlet or indoor head per floor, including each level of a split-level, mezzanine level, etc., of each dwelling unit in the building. In some instances, more than one warm air supply outlet and/or indoor head per floor may be required to ensure heat distribution to the entire building.

For more information: Natural Resources Canada has developed a package of materials related to air source heat pump sizing and selection, intended for use by mechanical system designers and renovation contractors. <https://www.nrcan.gc.ca/maps-tools-and-publications/tools/modelling-tools/toolkit-for-air-source-heat-pump-sizing-and-selection/23558>

OHPA Application number: _____

AHRI number(s) of the installed heat pump system(s): _____

I _____,
(Name and surname)

as a representative of _____,
(Name of the mechanical system design/contractor company)

located at _____,
(Complete address of the company, City, Province / Territory, Postal Code)

with the telephone number _____

and email address _____, attest that the

equipment installed at _____,
(Complete residential installation address, City, Province / Territory, Postal Code)

and commissioned on _____,
(Date)

meets the heat distribution eligibility criteria of the Oil to Heat Pump Affordability program and is capable of distributing heat throughout the entire home and

the ground source heat pump system has been designed and installed in accordance with the latest version of the Canadian Standards Association CSA/C448 standard.

Signature of contractor who installed the heat pump
